

Features

- Isolated wide input voltage range: 18-72 VDC
- User friendly modem “AT” command set
- Standard RS 232 serial interface

Applications

- Refineries
- Storage Sites
- Agricultural Projects
- Military Facilities
- Research Installations
- Water/Waste water Systems
- Heavy Industry and manufacturing
- Oil and Gas Fields

Overview

IM 56K is designed for easy integration and quick time-to-market embedded applications. It is ideal for monitoring of pressure, temperature, liquid level, flow, etc. in industrial applications.

Industrial Modem 56 Kbps

Specifications

Maximum Data Throughput	Upto 134.4 Kbps
Data Speed	56 Kbps
Data Compression and Error Correction	MNP 2-4, MNP 5, V42, V42.bis, MNP 10
Interface	RS 232 Asynchronous

Power Supply	18-72 VDC
Maximum Current	40 mA @ 48V
Mechanical	6 x 3.7 x 1.6 inches (L x W x H)
Environment	-30°C to +65°C
